**Are you looking for a meaningful and challenging career in health care?**

**LOOK NO FURTHER THAN RIVERVIEW HEALTH CENTRE!**

At Riverview, we provide a supportive environment with experienced leaders who strive to help their teams provide compassionate care for our patients and residents.

You will find an atmosphere of collaboration, trust and team spirit, with all staff members working towards the overall goal of enhancing the quality of life of those in our care.

**About Riverview Health Centre**

- 387-bed facility located on 25 acres of riverfront parkland on the banks of the Red River near the heart of Winnipeg, Manitoba.
- Home to a variety of programs that meet the health care needs of Manitobans.
- Supports progressive programming for patients and residents in hospital and personal care home units, as well as outpatient and community programs.
- Provides innovation through education and state of the art research activities, including virtual reality programs and dementia assessment and treatment.

**Our Core Programs**

**Neurology Rehabilitation**

Riverview's Neurology Rehabilitation program provides comprehensive interdisciplinary care for adults with neurological impairments due to stroke and acquired brain injury.

**Palliative Care**

The Palliative Care unit is designed for patients with life-limiting illnesses who are registered with the Winnipeg Regional Health Authority Palliative Care Program and require the knowledge and expertise of an interdisciplinary palliative care team. The focus of care on the unit is to provide symptom relief and emotional support to help patients achieve the best quality of life possible.

**Long Term Care**

Riverview's Long Term Care units provide safe, comprehensive and supportive care for individuals who are no longer capable of living independently in the community. The Long Term Care program offers residential services in a variety of areas, including: general Personal Care Home units, a Chronic Respiratory Care unit, and a unit for individuals requiring long term ventilation. Riverview is home to the Alzheimer Centre of Excellence (ACE), two units dedicated to caring for residents with advanced dementia.

**Be Part of the Team!**

Our programs offer a full range of professional care, including physicians, nurses, health care aides, pharmacists, occupational therapists, physiotherapists, registered dietitians, spiritual care providers, social workers, speech-language pathologists, rehabilitation assistants and recreation facilitators.
